

 **Interclamp**®

Summit

MODULAR FREE STANDING EDGE PROTECTION

PRODUCT INTRODUCTION

Rooftop guardrail systems are a critical component of any effective roof safety strategy, particularly for buildings with regular access requirements such as maintenance or inspections. Designed to prevent falls at height, these systems provide reliable, collective protection that significantly reduces the risk of accidents.

The Interclamp Summit system offers a practical, non-penetrative solution that combines safety, durability, and ease of use, making it the ideal choice for facility managers, contractors, and building owners.

Compliant with BS EN 13700:2021 and meeting the requirements of the UK Work at Height Regulations. The system can also be configured to work around rooftop obstacles such as HVAC units, plant equipment, or solar arrays.

KEY FEATURES

Non-Penetrative

Adjustable and Adaptable

Recycled PVC Weight

Wind Speed Calculations

COMPLIANT WITH THE BELOW STANDARDS

- ✓ **BS 13700:2021 - Permanent Counterweighted Guardrail Systems**
- ✓ **BS EN ISO 14122-3:2016 - Safety of Machinery - Permanent Means of Access to Machinery**
- ✓ **BS EN 13374:2013 - Temporary Edge Protection Systems**
